

Mobile Document Productivity Suite

Full featured document management app – Securely view, edit, create, print, share, present, convert documents to PDF on your mobile device.

Over 350 million copies of SmartOffice have been shipped or downloaded since its creation. We offer the truest, most accurate representation of Microsoft Office documents available on a mobile app. Our small app size and screen display that adapts to fit your smartphone or tablet makes SmartOffice the perfect match for today's on-the-go world.

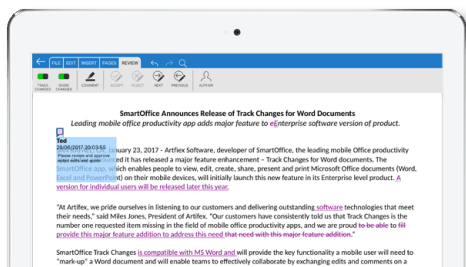

- Accurately displays MS Office files, PDF files, plain text (.txt) and images
- View/Edit existing MS docs – Word, PowerPoint, Excel
- Create new Office docs using blank or free pre-loaded templates
- Deliver PowerPoint presentations directly from your mobile device
- PDF Viewer, Reader and support for image file formats (JPG, PNG, GIF, vector, etc.) as well as HWP

- PDF Viewer Reader and support for image file formats (jpg, png, gif, vector, etc.)
- Annotate PDF docs with comments, highlights and freehand drawing
- Save in original file formats or convert to PDF
- Compatible with all MS Office versions since 1997 (view and edit)
- Screen display adapts to fit your tablet or smartphone; small download file size (28MB) = fast loading
- Print directly from SmartOffice to thousands of supported wireless printers
- Support for over 37 languages; supports Android, iOS, Windows Mobile smartphones and tablets

With SmartOffice you can easily view, edit, create, print, present and share Microsoft Office and PDF documents via your mobile device.

NEW – Next Generation SMARTOFFICE 3.0!

SmartOffice has been redesigned to provide a more intuitive, easy-to-use workflow with a sleek new look inspired by the familiar UI of a desktop Office document. SmartOffice 3.0 offers the same powerful features with an enhanced user experience.
