

Empower Your Mobile Workforce with SmartOffice SDK for Enterprise

Get your mobile workforce up and running quickly and efficiently while ensuring the security of your enterprise document workflow.

SmartOffice SDK can be securely incorporated into your enterprise document workflow platform. The SmartOffice SDK seamlessly and securely integrates with your EFSS, MDM or EMM environment.

Solve the BYOD Dilemma

When integrated into your company's mobile security environment, SmartOffice provides a safe way for mobile users to work with MS Office and PDF documents regardless of device. Users can view, edit, print, share and present documents on iOS and Android devices within your security platform. Enterprise information is secured while employees remain productive while on the go.

SmartOffice is designed for today's mobile devices. The small download file size (30MB) ensures fast loading and high-quality performance. SmartOffice delivers the truest, most accurate representation of MS Office documents and PDF available on a mobile device.

Enterprise IT Control and Customization

SmartOffice SDK provides all the functionality and features of our SmartOffice app, secured within the enterprise's encrypted network. Enterprise IT departments can prevent data breaches via SmartOffice SDK controlled access permission tools and customizable document editing controls, that extend down to the user or document level.

For further security, SmartOffice SDK also provides a version that allows only non-editable, view only versions of documents.

Secure permissions that protect potential abuse include:

- Email/sharing file restrictions
- Editing and PDF export
- Save as
- Clipboard access (copy/paste restrictions)
- Camera and image/photo selection
- Printing

Securely access documents through your organizations security platform. Your corporate data is never exposed to vulnerable files or applications.

SECURITY FEATURES INCLUDE...	BENEFITS
Save encrypted files through a secure container	Prevent vulnerability due to theft/hacking/malware
Prevent data leakage to clipboard, email, printing, SharePoint	Content contained within the secured perimeter
Control access to corporate documents	Enforce IT policies and compliance
