

Complete PDL and Document Ecosystem of Products

Artifex is a trusted creator, partner & provider of core technologies for document handling and management. We provide premiere PDL technologies (PostScript, PDF, PCL & XPS) to all major printer manufacturers, document management solutions companies and PDF tools/creation solutions companies.

Through Artifex technologies our partners can view, edit, convert, render, and print any major document format on a desktop, laptop, tablet, smartphone and cloud server. In recent years, Artifex has also become a primary provider of technologies for mobile and cloud markets. All told, over 100 OEM customers now depend on Artifex products.

- Printing and document management customers include ActivePDF, EMC, Epson, Hewlett Packard, Konica, Kyocera, Oce/Canon, OpenText, Oracle, PitneyBowes, Ricoh, and Xerox.
- Mobile, cloud and electronics partners include Adobe, BenQ, Blackberry, Deutsche Bundesbank, Dropbox, Garmin, Google, Hewlett Packard, Intel, LG, Samsung, and United States Air Force.
- Artifex also offers end-user mobile app solutions through all major apps stores.

Our dedicated focus on precision, quality and outstanding customer service make us an exceptional partner for leading technology companies. Our technology offerings include:

Ghostscript

PDL Interpreter that is an industry leader in PDF, PostScript, PCL, and XPS rendering and conversion.

MuPDF

A lightweight PDF and XPS interpreter that offers the interactive features for PDF.

SmartOffice

Mobile document productivity suite for viewing, editing, creating & printing full range of MS Office documents and related files.

Artifex is headquartered in Novato, CA, with offices in Boulder, Dallas, Los Angeles, Seattle, United Kingdom, Sweden, Japan and Korea. Our global team of engineering experts enables us to support customers around the world; you can count on us for continuous product enhancement, upgrades, fixes and support.

Ghostscript offers the most comprehensive set of PDL interpreters for rendering or conversion available on the market today.

- **Conversion** – Convert to or from PDF, PostScript, PCL or XPS languages. No other product delivers this breadth and depth of capabilities.
- **Normalizing “bad” PDF files** – Superior ability to convert a poor quality PDF into a clean file reliably opened by all major PDF viewers.
- **Complete font solutions** – Ghostscript has a very broad range of commercial quality font solutions available for use. This includes PostScript fonts, PCL fonts, and Asian fonts.
- **Versatility** – Highly customizable solution that runs on all major operating systems, Ghostscript has been deployed on a full range of host-based and cloud solutions.
- **Performance** – Small (3MB), exceptional color management and fast as lightning.
- **Proven** – Over 2,000 customer years of operational testing and delivery has refined the product and prepared us to deal with any technology situation.
- **Support** for new PDF 2.0 standards.

MuPDF delivers a lightweight PDF and XPS interpreter while also including interactive PDF features. Perfectly suited for lightweight printers, mobile, ePub and other embedded applications.

- **Small footprint** – 2 MB for base level code.
- **Outstanding renderer** – Tailored for high quality, anti-aliased graphics; renders text with metrics and spacing accurate to within fractions of a pixel for the highest fidelity in reproducing the look of a printed page on screen.
- **Reads XPS and OpenXPS documents.**
- **Support for PDF 1.7 transparency and encryption.**
- **Written modularly** – Features can be added on by integrators as desired.
- **Support for interactive features** – Including annotations, search, copy text, form filling, digital signatures, text reflow, hyperlinks, JavaScript and transitions.

SmartOffice is a leading mobile app for viewing, editing and managing MS Office documents and associated files.

- **Full-featured productivity app** – View, edit, create, save, share, print and present Office documents. View/annotate PDF's. View image files.
- **Advantages vs MS Office 365** – 50 times smaller (20 MB vs. 1 GB). PDF viewing and annotation capability. Fully functional without Internet (work on files natively).
- **Securable** – Able to wrap or containerize application on wide range of mobile security platforms (MDM, EMM, EFSS).
- **Enterprise flexibility** – SmartOffice brand or Customizable SDK (SmartOffice DevKit) with full feature set or “viewer only” version. Enables IT to set and administer permissions and policies.
- **Embedded applications** – SDKs to enable viewing documents and/or files in a range of use cases – electronics, hardware, device, cloud.
